

The easy way to pack and ship

# E-fashion products

No more messy packing tables or slow order processing. The EasyOpen System keeps your e-fashion shipments moving with pre-stacked bundles of 250-350 bags. They come ready to fill, just grab your products and fill in one quick motion.

## Filling shipping bags by hand

Packing orders has never been this easy! With our EasyOpen system, you open the hanging bag with one hand, while the other places one (or multiple) products inside. Gravity does the rest, ensuring everything lands neatly at the bottom. Then, remove the adhesive strip, lift the bag off the pins in one motion, and seal it on your packing table. Quick and simple.

### Keep packing for hours

No more stopping to reload, just keep going!

### Gravity does the work

Bags hang instead of lying flat.

### Effortless use

Open with one hand, place items with the other.

EasyMail

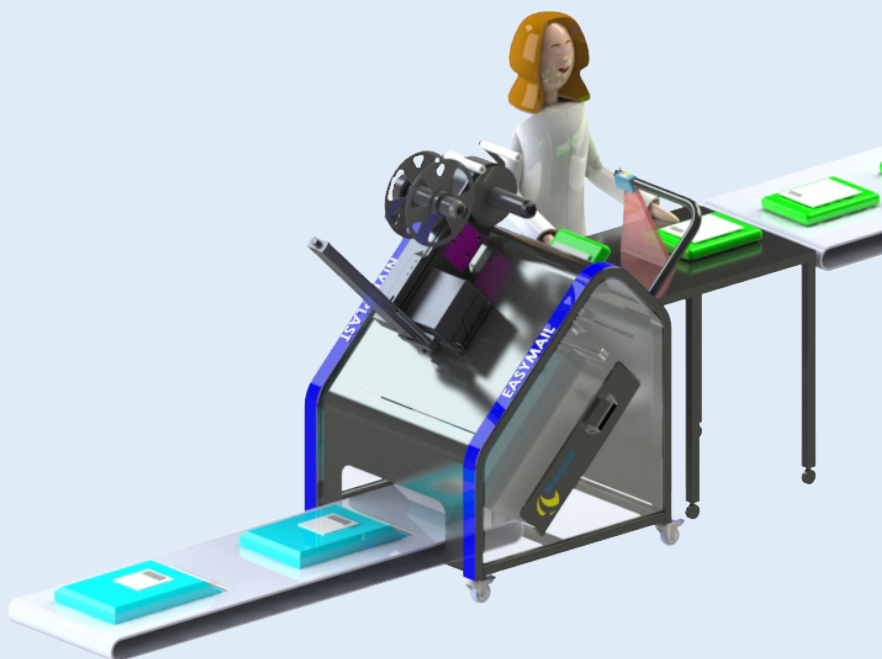

# Automatic shipping bag packaging

The EasyMail is a revolutionary machine that streamlines your packaging process. This automated solution opens bags, seals, and labels them for shipping, making it up to 3 times faster than manual packaging. With our low total cost of ownership guarantee, the EasyMail is a cost-effective investment for your business. That is packaging at its best!

## Applications

The EasyMail is suited for any product that can be shipped in a sturdy bag. A good example is the E-fashion or E-cosmetics industry. But this machine fits any product with a possible return process.

- Suitable for different bag sizes
- Uses prefab bags
- Plug and play
- Able to run standalone & inline
- Only one resealing strip needed
- Ergonomic design
- Easy and very simple to operate
- Integrated label scanner
- Automatic printing & labeling
- Able to operate from both sides
- Reliable, low maintenance, cost efficient
