PaperBagger

# Paper bag placing

Looking to reduce the time to fulfil your orders while cutting process costs? Meet the world's first and only paper bag placing machine!

The PaperBagger automates the placement of paper bags into a tote, bin or box, depending on your preferred packaging method. With its modular design, the machine offers scalability, achieving speeds ranging from 12 to an impressive 36 bags placed per minute. The PaperBagger can operate as a standalone unit or be integrated into any (existing) packaging line. It delivers a proven Return on Investment (ROI), a calculation we'd be loved to work out with you. Our commitment is to always offer our customers the lowest Total Cost of Ownership (TCO), which means that in comparison to other solutions, our machine ensures long-term cost savings, what makes this investment a compelling choice for your packaging needs.

Always a  
perfect fit for  
all your crate  
sizes

## Specifications

- ✓ Bag fixation by folding short side of the bag
- ✓ Very easy to adjust and operate
- ✓ Multiple modules able to function standalone
- ✓ Reliable, low maintenance, cost efficient
- ✓ Left- or right-handed version available
- ✓ On-screen HD visualisation of warnings and possible machine functions
- ✓ Remote support
- ✓ Custom built on request
- ✓ Operates stand-alone as well as in any automatic production line
- ✓ Guaranteed lowest Total Cost of Ownership

## Single, double or triple?

The PaperBagger is engineered to be versatile, efficient, and flexible in packaging, thanks to the flexible bag placing modules. Let's uncover how this works.

Whether it's the single, double, or triple version, each PaperBagger can place one, two, or even three bags into a crate. You don't need multiple machines; one machine with multiple modules can handle diverse packing needs.

Every bag placing module operates at a consistent rate, capable of managing up to 12 bags per minute.

Modules are designed to function independently, but also work together. In setups requiring multiple bags in one crate, one module follows the other, ensuring every crate is packed according to the right specifications.
