5 Fully-automatic palletizing area

- Specialized grippers for several packaging formats
- Make it fully automatic with:
- The pallet destacker
- The sheet table, to separate the layers
- An automatic stretch wrapper and labeler

'PowderFilling, the business where cross contamination belongs to the past!'

What do you need?

Along with the product that needs to be filled into cases or buckets a perfectly square case with a tightly placed bag is needed to pack the powder.

How to achieve this?

With over 30 years of experience, Niverplast has been improving businesses all over the world with the automation of our packaging equipment.

Research & development and happy customers have been our top one priority. 'Together', is our key to success.

Whom?

Niverplast's passionate people have developed a complete and perfect powder packaging solution.

What machines?

- Case erecting with perfect bag placing integrated in one machine – the **CombiPlast**.
- Filling very accurate with our ATEX certified **PowderFiller**, up to 2.400kg/h. Unbeaten weighing accuracy will bring you maximum savings. With our **VarioClip** we use thorough cleaning at every stroke to prevent cross contamination.
- Afterwards the top of the box will be closed with our **Taper**. To create an even smaller footprint, case top closing can also be integrated in the **VarioClip**.

A perfect way to hand over your product to your customer with the slightest touch of hand labour.

Powder coating, egg-powder, coffee-powder and cinnamon-powder are just a few examples of products which can be packed perfectly with an automated packaging line from Niverplast.

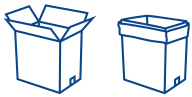

Do you have a powder product that needs to be bulk packed into cases or buckets and do you want to automatize your packaging?

Niverplast is your passionate partner in improving your business!

Who we are

We're a worldwide player in the packaging industry and located in The Netherlands. We believe that happy people create happy customers! We are passionate, think different and are continuously developing ourselves and the products we deliver.
